PROFESSIONAL SUMMARY

Mobile application developer with 7+ years of experience across native Android, Flutter and enterprise mobile products. Hands-on technical leadership spanning product architecture, team coordination, API integrations and performance optimization. Work includes HRMS and workforce management, face recognition attendance, community platforms and white-label applications, with additional hands-on experience in iOS app development, C#, PHP and APIs, Python projects and FastAPI.

TECHNICAL EXPERTISE

Android: Kotlin, Java, Android SDK

Architecture: Clean Architecture, MVVM, SOLID

Data: SQLite, Hive, MySQL

AI interests: OpenAI, Gemini, Claude, MCP

Tools: Git, GitHub, Android Studio, VS Code, Xcode

Flutter: Dart, Flutter, BLoC, GoRouter

Backend & APIs: PHP, Python, FastAPI, REST, Retrofit, Dio, JWT

Other platforms & languages: iOS app development, C#

SELECTED PRODUCT CONTRIBUTIONS

Role: Lead & Core Developer. Contributions are part of team and organization product development; product ownership belongs to the respective publishers.

MyCo HRMS & Lens MyCo

Mobile product development across workforce management and face attendance workflows. MyCo connects attendance, shifts, leave and employee communication; Lens supports face recognition attendance on Android phones and tablets with myCo synchronization.

Smart Society, Fincasys & My Association

Mobile contributions across residential community and association platforms: member directories, visitors, maintenance, communication, security, events and notices. Work also includes white-label releases for different organizations and communities.

LEADERSHIP & ENGINEERING APPROACH

- Translate business requirements into practical mobile implementation and architecture decisions.
- Coordinate development work and contribute to enterprise application delivery.
- Build reusable foundations and connect mobile interfaces with backend services.
- Extend Android experience into Flutter and explore AI integrations in mobile applications.
